Type:
Speaker stand

Recommended for:
Studios | Recording rooms

Dimensions:

0x0x0mm | 0.0 Kg

Artnovion Speaker Stand originated from a joint effort of 3 of the best companies in their respective fields: Designed by Jan Morel, engineered by Sessiondesk and manufactured by Artnovion, the Vector Speaker Stand is a brand new addition to our vast range of acoustic solutions for your room.

Vector Speaker Stand is more than a simple stand, It is equipped with Superspikes that provide incomparable stability and support, and a VABT (Velocity Absorber Bass Trap) core, an innovative way to control room modes, utilising a carefully calibrated combination of foam densities, taking advantage of layout of the speaker stand stands in high velocity zones.
